

MARITIME Clean Air

Air Filter Cleaning

Our air filter cleaning dry process uses only air, vibration and vacuums to clean your filters. We do not use chemicals, liquids and hazardous materials which would cause swelling and shrinkage.

It's time for your employees, your engines and budgets to breathe easier!

- *Why throw away expensive air filters when they are only dirty not dead!*
- *Don't bite the dust on new air filter costs!*

Cleaning your air filters saves you
40-60% VERSUS BUYING NEW!

MARITIME Clean Air

Air Filter Cleaning

We Clean!

Our specially designed air cleaning equipment allows us to clean a wide variety of air filters, including those from:

- Trucks
- Heavy Construction Equipment
- Farm Equipment
- Forestry Equipment
- Sand & Gravel Equipment
- Mining Equipment
- Dust Collection Systems
- Sandblasting
- and more...

We Inspect!

Each filter is carefully inspected by experienced technicians looking for bad or loose gaskets and dents & wear. Our advanced inspection equipment detects pinholes and other damage that might not otherwise be found.

We Track!

A computer barcode label identifies every filter and tracks its cleaning history.

We Deliver!

We offer a reliable pick-up & delivery service to our customers as we have done since 2002.

Benefits!

- Reduces your on-hand inventory of new air filter elements.
- Reduces your operating expenses.
- Environmentally friendly as there are no chemicals used.
- Each time a filter is cleaned and re-used, unnecessary waste is spared from landfill sites.

We provide a full line of new Donaldson filters at very competitive prices!
